ASTEROIDS™
DELUXE
• One or two player competition.
• New "shield" control provides temporary force field protection.
• New "smart" saucers fire at spacecraft and asteroids
• New Killer Satellite provides extra target challenges.
• Asteroids move faster, "tumble" realistically.
• QuadraScan™ video graphics "float" over actual three-dimensional full color playfield
• Six digit score counter displays 999,990 points
• Four operator-adjustable bonus levels.
• New high score table retains top three scores even when power is off.

Killer Satellite Sequence

The profit revolution continues.

ASTEROIDS™ was the genesis of a modern revolution in video game technology and player appeal

Now ASTEROIDS DELUXE™ continues the video revolution with incredible new realism, new competitive skill challenges, new repeat playability With more new features that make this ultimate Asteroids game experience your ultimate earnings experience

Reality, the new innovation.

The game begins with the player s spacecraft positioned at center screen The asteroids appear slowly at first

Suddenly the ship is engulfed in a storm of deadly space rocks The pilot must maneuver instantly, rotate the ship right and left, energize his thrusters the longer the spacecraft can avoid destruction, the more rocks and enemy saucers can be blasted away for points

Atari's unique QuadraScan™ video graphics are superimposed over a full color painting of an asteroids stream Blacklight illumination and raised cutout rocks and spacecraft offer players a realistic illusion of dimensional space

New Shield protection.

If collision with an asteroid or a direct hit from an enemy spacecraft is unavoidable, the player may press the 'Shield ' button to protect his ship from attack temporarily The 'Shield must be used sparingly as the force field fades and eventually disintegrates if used excessively Shields are re-energized at full strength for each new spacecraft "life"

New Killer Satellite target.

Play challenge increases as score increases During the second wave of asteroids and during each succeeding onslaught, a deadly Killer Satellite veers onto the playfield A hit on the Satellite explodes it into three smaller craft then into six even smaller targets after each is hit Each segment of the Satellite also chases the player s craft with a doggedness that increases as the player s score increases, until all segments are destroyed

New "Smart" Saucers.

Enemy saucers are more intelligent Both large and small 'enemy" saucers shoot at player s ship, rocks and Killer Satellite The large saucer fires three out of four shots at asteroids the fourth at the player The small saucer fires two out of three shots at the player, the third at asteroids

This feature eliminates the possibility of players ' lurking" behind an asteroid to ambush saucers as they appear

Special High Score Table. New non-volatile memory.

The ten best scores on the game can be displayed along with the corresponding player's initials in the attract mode The new non-volatile memory feature retains the top three scores if power is off

New Operator profit options.

Bonus Levels: Bonus lives can be awarded at 10 000 12 000 or 15,000 points or no bonus

Coinage: 256 coin options including 2, 3, 4 or 5 lives/ 1 coin 3, 4, 5 or 6 lives/2 coins, and ATARI s newest coin option 2 game minimum

Languages: English French German or Spanish video message presentations

Game Scoring:
Large Saucer = 200 points
Small Saucer = 1000 points
Small Asteroid = 100 points
Medium Asteroid = 50 points
Large Asteroid = 20 points
Killer Satellite = 50 points
Large Segment = 100 points
Small Segment = 200 points

Dimensions:

Upright: Height 71 in , 180 34 cm , Width 26 75 in 67 95 cm , Depth 25 25 in 64 14 cm Weight 313 lbs , 140 85 kg Monitor 19 in QuadraScan

Cabaret: Height 54.25 in , 137 79 cm , Width 20 44 in , 51 91 cm Depth 23 75 in 60 32 cm , Weight 193 lbs , 86 85 kg Monitor 15 in QuadraScan

Cocktail: Height Adjustable from 21½ in to 27⅞ in Width 32 in , 80 5 cm Depth 24 in , 60 cm , Weight: 164 lbs , 73 8 kg Monitor 15 in QuadraScan
